Re: Thermal Oxidizer Air Construction Permit

Dear Greg,

I spoke with the Indiana Department of Environmental Management, Office of Air Management, (IDEM, OAM) today regarding the construction permit for Dygart Seating. Ms. Angie Lee, Scientist with the IDEM, OAM, has completed review of the permit application and has forwarded the application for approval. You should be receiving a registration permit in the mail in the very near future.

There will be subsequent documents that will be forwarded to you by the IDEM, OAM. Should you receive anything, please contact me so that I may review it with you. After you receive the registration letter, we should establish a meeting time to discuss additional areas of reporting as related to the thermal oxidizer. There were also other areas which were discussed with Mr. Dick Paulen, Barnes & Thornburg that should be addressed.

I will contact you in the next few weeks or if any additional response has been requested by the IDEM, OAM. Should you have any questions, please contact me at your earliest convenience.

Very Truly Yours,

Tris O. Gour  
Industrial Safety and Environmental Services
